

Pin Oak Corpus Christi, LLC

Job Title: HSE Engineer	Job Location: Corpus Christi, TX
-------------------------	----------------------------------

General Summary

The Health, Safety and Environmental (HSE) Engineer is responsible for developing, implementing and maintaining comprehensive environmental, safety and regulatory programs and policies to ensure compliance with all local, state and federal regulations.

Essential Functions

The HSE Engineer is responsible for actively managing compliance with all applicable federal and state regulations including OSHA, EPA, TCEQ, USCG, Railroad Commission of Texas, GLO, USACE, and DOT.

Specifically, the HSE Engineer must be able to perform the following functions:

- Develop, implement, maintain and evaluate HSE policies and programs (safety, process safety, environmental)
- Develop and implement HSE strategies to ensure and verify compliance with all applicable regulations and permits.
- Subject Matter Expert in process safety and personnel safety including incident investigation, hazard assessment, and management of change.
- Understand and evaluate potential safety hazards for company facilities. Develop and implement programs for monitoring and preventing safety hazards.
- Perform evaluations of existing and new processes to ensure all HSE requirements are being met and recommend improvements to eliminate, reduce, or control hazards and ensure ongoing compliance.
- Propose and/or provide corrective action plans, written or verbal for incidents.
- Support development of safety meeting materials and provide required information to the team.
- Maintain an understanding of all environmental permits and be able to communicate the requirements for compliance to the organization.
- Work with project teams and consultants to obtain environmental permits for new facilities or modifications to existing facilities.

Competencies, Education, Knowledge, Skills and Abilities

- Bachelor's Degree in engineering or environmental science required.
- 10+ years of experience in process safety, personnel safety and/or environmental engineering in the oil and gas industry required. *Experience with **both** environmental and process safety is strongly preferred.*
- Experience must indicate the existence of specialized knowledge and successful track record in the initiation, design, implementation, and monitoring of safety, environmental and/or compliance programs.
- Knowledgeable of OSHA, EPA, TCEQ, USCG, Railroad Commission of Texas, GLO, USACE, PHMSA regulations related to the oil and gas industry.
- Must be able to understand and give verbal and written forms of communication including preparation of clear, concise and accurate reports

Physical Demands

The physical demands described here are representative of those that must be met by an employee to successfully perform the essential functions of this job. While performing the duties of this job, the employee is regularly required to talk or hear. The employee frequently is required to stand; walk; use hands to finger, handle or feel; and reach with hands and arms.

AAP/EEO Statement
